8th Inter-University Invitational Civil Engineering Competition
Unimap Modenas Racing Challenge 2014
12th IUKL Convocation
8th Inter-University Invitational Civil Engineering Competition
Japanese Student Exchange Programme
We are now coming to the end of 2014 and what a great year it has been!

In this December 2014 Communique issue, you will see plenty of activities not only involving our students but staff as well. Here at IUKL, we take pride in what our staff and students accomplish.

We have pursued a number of memorandums of understanding and agreements, and collaborations have been made with institutions and industries across the globe to provide greater opportunities for our students to do their internships with reputable organizations. More new programmes have been developed and are offered soon such as the, Bachelor of Biotechnology (Hons), Bachelor of Science (Hons) in Logistics and Supply Chain Management, Bachelor of Science (Hons) in Economics and Finance and Master of Science in Construction Management. Other new programmes are in the pipeline to be offered so there will be more choices for students to pursue their interests.

Our six faculties have been very active in getting the students to participate in activities such as the Pertandingan Rekacipta dan Inovasi Institusi Pengajian Tinggi Swasta 2014 (PERINTIS 2014), the Modenas Racing Challenge at the University Malaysia Perlis, 8th Inter-University Invitational Civil Engineering Competition 2014 (IUICEC 2014) which was held at the University of Melbourne, Australia, and the International Cultural Night 2014, to name a few.

I hope you will enjoy this last issue for the year 2014.

For Knowledge, For Humanity
On 10 September 2014, the Research Management Centre (RMC) of the Infrastructure University Kuala Lumpur (IUKL) in collaboration with the Ministry of Science, Technology and Innovation (MOSTI) organized the ‘Pertandingan Rereka dan Inovasi Institusi Pengajian Tinggi Swasta 2014 (PERINTIS 2014)’ at the university’s Multipurpose Hall. This event was organized with the approval and support from Ministry of Education (MOE).

About 97 groups of inventors competed in this event and exhibited their best innovative products. 78 products were under the ‘Institution of Higher Learning’ category while 21 products were from the ‘Young Inventors’ category. 43 products were presented by our IUKL staff and students. This event also welcomed companies such as the Nuclear Malaysia Agency, the Malaysian Meteorological Department, the Standards and Industrial Research Institute of Malaysia, the Malaysia Genom Institute, Pusat Sains Negara (exhibited in a bus) and PINTAS IP Group to exhibit their products to the crowd.

The welcoming address was delivered by Prof. Dr. Roslan Zainal Abidin, the President and Vice-Chancellor of IUKL, and the opening speech was given by Y.B. Datuk Dr. Abu Bakar Mohamad Diah, Deputy Minister of Science, Technology and Innovation, Ministry of Science and Technology (MOSTI). The event then resumed with visiting the participants’ booths, a judging session, and an innovation talk by PINTAS before the judges’ deliberation. The participants were judged by novelty and inventiveness, commercial potentialities/business alignment, usefulness and contribution, academic recognition/IP recognition, and presentation and demonstration.

IUKL managed to grab two gold, eight silver, and 16 bronze medals comprising all the faculties in the university. The two gold medallist teams were from the Faculty of Engineering and Technology Infrastructure. The first team were Dr. Nurharniza Abdul Rahman, Ms. Najiah Adam Tong and Ms. Noor Sahirah Ishak, led by Mr. Amirullah Maat, won with ‘The Sturdiness of Composite Column’ product while the other team encompassing Prof. Dr. Roslan Zainal Abidin and Ir. Mohamed Ayob, led by Ms. Naimah Yusoff, won with ‘Ron Classification for Forecasting Riverbank Erosion’ product.

PERINTIS 2014 is held once in two-years where IUKL demonstrates its pivotal role in bringing research and innovation to a much higher level while building network with academic communities all over Malaysia. This event also has awards for the ‘Young Inventor Award’, the ‘Most Promising Invention Award’, the ‘Commercial Potential Award’, the ‘Best Booth Award’, and special awards from the Malaysian Research and Innovation Society, the Hong Kong Invention Association and the Korea University Invention Association.
**ACADEMIC LINKAGES**

**COLLABORATION WITH ROYAL MELBOURNE INSTITUTE OF TECHNOLOGY (RMIT) AND MONASH UNIVERSITY, AUSTRALIA**

An Academic and Research Collaboration was initiated between IUKL with RMIT and Monash University at Monash University, Melbourne, Australia on 9 July 2014.

About 800 graduates received their Masters, Bachelor Degrees, and Diploma scrolls from YBhg. Tan Sri Dato’ Ir. (Dr.) Wan Abdul Rahman Bin Haji Wan Yaacob, the Chancellor of Infrastructure University Kuala Lumpur (IUKL) at the 12th IUKL convocation ceremony on 6 September 2014.

Held at the university’s main hall, the event was also witnessed by YBhg. Academician Dato’ Ir. (Dr.) Lee Yee Cheong, the Pro-Chancellor of IUKL; YBhg. Tan Sri Datuk Hadi An Abdul Jalil, the Chairman of the Board of Governors; Executive Director of the Education Division, IUKL; Professor Dr. Roslan Zainal Abidin, the President and Vice-Chancellor of IUKL; parents, representatives from the embassies and distinguished guests.

The graduation ceremony was held in three sessions. The first session started with the procession of students and academic staff followed by the grand procession of YBhg. Tan Sri Dato’ Ir. (Dr.) Wan Abdul Rahman Haji Wan Yaacob into the hall. He conferred the Master and Bachelor degrees to the postgraduate and undergraduate students.

He also presented the Chancellor’s Award and the Vice-Chancellor’s Award to the top students.

The Chancellor’s Award recipient was Choo Choe Earn (Bachelor of Civil Engineering (Hons)), and the Vice-Chancellor’s Award Recipients were Lim Teck Huan (Bachelor of Civil Engineering (Hons)), Nithiyar Pandi Dorai (Bachelor of Communication (Hons)) in Integrated Marketing Communication), Anis Iliya Razlan (Diploma in Business Administration), and Saddamia Raudah Haron (Diploma in Quantity Surveying).

This year IUKL introduced the Industrial Awards which are given by our industry partners to reward students who have demonstrated outstanding academic achievement as well as active co-curricular involvement. The six recipients are four students from the Bachelor of Civil Engineering (Hons); Chong Chin Chung, Mohammed Ali Mohammed Albared, Sanjay Bose, and Tham Feh Fan, and the other two are Siti Fatimah Mohd Nor from the Bachelor of Business Administration (Hons) and Puteri Nadhirah Megat Ahmad Kamil from the Diploma in Biotechnology. These students received awards from prestigious companies such as APP Engineering Sdn Bhd, Ardhmillenia Sdn Bhd, Gagasans Teguh Sdn Bhd, Takatul Ikhlas Berhad, Wah Seong Corporation Berhad and Wiranda (M) Sdn Bhd.

The 12th IUKL CONVOCATION CEREMONY 2014
Technology is evolving the culture of working and studying. It plays an important role in the form of applications. With that said, the ‘Explore Google’ event was successfully held on the 15th of July, 2014.

Approximately 40 staff and students attended this sharing session. This event aimed to share further information on a several topics including cloud technology, how to use Google Apps, and how to utilize Google for education purposes, especially in assignments for students.

The Student Affairs Division invited the Kuantan chapter head of the Google Business Group, Mr. Lingesh from Google Malaysia, to share his knowledge. The staff and students were mesmerized by the free applications and how convenient they were.

Mr. Lingesh emphasised repeatedly that Google applications such as Google Street View, Google Plus, and Google Trend give us the latest updates in terms of information and statistics. He showed the functions of these applications, which attracted the interest of both staff and students. The number of hands raised during the session illustrated the level of interest of the students on the topic.

Two Google Student Ambassadors also shared their experiences and knowledge regarding the Google Ambassador Programme to the rest of the IUKL students.

With a good reception from the IUKL crowd, the Google team instantly agreed to visit the university again for another session.

Innovative Digital Economics have become more important, particularly in the last five years, due to the growing world population and resource mobilization. One of the initiatives in Digital Malaysia is Smart City Smart Village (SCSV). The goal of this initiative is to improve everything from energy use to healthcare, education, traffic, and shopping by doing it ‘smart’ with the help of ICT and green technology.

HONEYBEE COMPUTING ENVIRONMENT TO SUPPORT SMART CITY SMART VILLAGE APPLICATIONS - PUBLIC LECTURE

The ‘Honeybee Computing Environment to Support Smart City Smart Village Applications’ public lecture was held on the 9th of July, 2014, at the Centre for Postgraduate Studies’ foyer. The ultimate goal of this three-hour public lecture was to provide a thorough look at the Honeybee Computing Environment model and to show how the model could improve connectivity in terms of quality and secured services. The Faculty of Creative Media and Innovative Technology invited Prof. Dr. Abdullah Mohd Zain from University Kebangsaan Malaysia as the guest speaker.

The 76 participants, consisting of IUKL staff and students, received packages of dates as door gifts upon registration. The lecture was also attended by other universities such as Universiti Putra Malaysia, Universiti Kebangsaan Malaysia, Universiti Tenaga Nasional and Universiti Islam Antarabangsa.
The first public relations talk in fashion was held at IUKL on the 17th of July, 2014, at the Conference Hall. The ‘Satisfashion – When Communication Meets Fashion’ talk was organised by the students of Corporate Communication Strategies, under the Bachelor of Corporate Communication, Faculty of Arts, Communication and Education, Infrastructure University Kuala Lumpur (IUKL) as part of their final project.

The invited speakers were prominent figures in the fashion industry such as Mr. Nik Erwan, a fashion consultant, coordinator and mentor; Ms. Nurul Elnurul, a fashion publicist; and Ms. Bkay Nair, who is a grooming consultant.

Through this event, participants as well as the organizing committee members were exposed to many aspects of corporate communication and event management skills such as public relations, promotions, teamwork, negotiation, time management, conflict management, critical thinking, and designing skills. In addition, they gained more knowledge on the fashion industry.

About 23 staff and 170 students attended the talk and received door gifts as a sign of appreciation.
FACULTY OF APPLIED SCIENCE AND FOUNDATION STUDIES (FASF)

EDUCATIONAL VISIT TO BERYL’S CHOCOLATE FACTORY

The Department of Foundation Studies organized an educational visit to Beryl’s Chocolate Factory on 20 May 2014 which received a participation of 60 staff and students. This half-day trip aimed to get IUKL staff and students to:

1. Learn the processes and art of making chocolate
2. Acquire the marketing strategies
3. Provide fun and learning environment for students
4. Practise observational skills, curiosity and have an inquisitive attitude

At the factory, staff and students were given an educational tour and were mesmerized by the processes of making chocolate. The chocolatier offers more than 100 varieties of chocolate products such as a simple chocolate bar, handmade chocolate, tiramisu chocolate and fruits fiesta chocolate, just to name a few. All of the participants were chocolate lovers hence this trip was not only a mouth-watering experience but it was also a heavenly memory for them.

TALK SERIES

THE AWARENESS OF OPTOMETRY

The Faculty of Applied Science and Foundation Studies of IUKL organized a Talk Series on ‘The Awareness of Optometry’ on 10 June 2014, which was held at the Auditorium, IUKL.

Assistant Professor Dr. Lili Asma Ismail from SEGI University, who holds a Doctor of Philosophy in Community Health was invited as the guest speaker.

The objectives of the talk were to increase awareness to students on the importance of optometry, the importance of regular eye examinations in detecting and treating a range of eye diseases as well as to prevent eye injuries.

A total number of 128 students attended the talk; 54 students undertaking the Foundation in Science and 74 students undertaking the Foundation in Arts. The talk was expected to help students understand the importance of their eyes and daily measures to be taken to avoid eye injuries.

FASF RECYCLE DAY

Recycling is a key component of modern waste reduction and is the third component of the ‘Reduce, Reuse and Recycle’ waste hierarchy. On 6 June 2014, the Faculty of Applied Science and Foundation Studies (FASF) organised the ‘FASF Recycle Day’ to spread awareness on the importance of recycling and keeping the Earth clean.

A number of recyclable materials were collected that day such as used A4 papers, newspapers, plastic bottles, aluminium cans, computer hardware, boxes, metallic items and many more.

The majority of the participants were from among the FASF staff and students.

The faculty was proud to raise RM105 as a result from selling the recyclable items that were collected.

The Faculty of Applied Science and Foundation Studies of IUKL organized a Talk Series on ‘The Awareness of Optometry’ on 10 June 2014, which was held at the Auditorium, IUKL.

Assistant Professor Dr. Lili Asma Ismail from SEGI University, who holds a Doctor of Philosophy in Community Health was invited as the guest speaker.

The objectives of the talk were to increase awareness to students on the importance of optometry, the importance of regular eye examinations in detecting and treating a range of eye diseases as well as to prevent eye injuries.

A total number of 128 students attended the talk; 54 students undertaking the Foundation in Science and 74 students undertaking the Foundation in Arts. The talk was expected to help students understand the importance of their eyes and daily measures to be taken to avoid eye injuries.
On 18th June 2014, a Talk Series on ‘Exploring Opportunities for Tertiary Education and Professional Career Prospects in the Current Market’ was organized by the Faculty of Applied Science and Foundation Studies. The guest speaker was Dr. Joanne Tocher, Head of Bioscience from the University of East London. She obtained a PhD (Chemistry) from the University of Edinburgh, Scotland. The talk was held at the Academic Block 2, IUKL.

The objectives of the talk were to provide awareness to all participants on the opportunities and channels available for them to pursue tertiary education as well as to provide information on the current market need in the professional line.

Approximately 20 students undertaking Foundation in Science, ten students from the Diploma in Biotechnology and ten students from the Diploma in Sports Management attended the talk.

Through this talk, it is hoped that IUKL students will have a better understanding of the current needs of professionals in the market and to help guide them in choosing the field that is relevant to their interest.

When Leonardo da Vinci created his Vitruvian Man, he showcased how the human form embodies the principals of architecture at its peak of perfection. He also revealed that the body and its abilities are just as vital to intelligence as is the mind. Sports in institutions embody this concept. They showcase athletic intelligence alongside academic victories. From better student grades to strong community roots, sports provide the gears that run universities.

IUKL promotes this concept and provides opportunities for students to explore their interests with practical experience through activities organised throughout the year. On the 23rd of August, 2014, the Faculty of Applied Science and Foundation Studies in collaboration with the Marketing and Communications Division, and the Sports Unit organised the ‘IUKL Futsal Carnival 2014 - President Cup,’ which took place at the university’s futsal court.

EDUCATIONAL VISIT TO THE MALAYSIAN PARLIAMENT

About 40 IUKL students had the opportunity to participate in the educational visit to the Malaysian Parliament in Kuala Lumpur on the 20th of August, 2014.

Under the supervision of a few IUKL staff members, the students departed by bus at eight in the morning and took 45 minutes to reach their destination.

Organised by the Faculty of Applied Science and Foundation Studies, the visit aimed to inform the students about the roles and functions of the Parliament as well as the processes involved in meetings. This visit was also related to the Malaysian Studies subject.

A Parliament Officer gave a short briefing to the staff and students, and they were then taken on the tour. Through this educational experience, students were able to gather information about the Senate, House of Representatives, and the procedures for how a Bill becomes a Law.

This educational visit was an invaluable and memorable experience.

MALAYSIAN PARLIAMENT
EDUCATIONAL VISIT TO THE
– PRESIDENT CUP

The main objective of this carnival was to market the Diploma in Sports Management programme to future potential students studying in secondary education and will be sitting for SPM by the end of this year. Furthermore, the event was also to promote and encourage a healthy lifestyle among the public community.
The Infrastructure University Kuala Lumpur (IUKL) were crowned the champions of the ‘IPT League 2014: Selangor Zone Qualifier’ football match, which took place at Universiti Teknologi Mara (UiTM), Perak, from 14 to 18 May, 2014. The match was a qualifying round for the second middle zone among the Private Higher Education Institutions. IUKL won the semi-finals round against Politeknik Sultan Idris Shah, Selangor, by 2-0. In the finals round against the National Defence University of Malaysia, IUKL won by 2-1 with a goal which was scored by Mohamed Efadiil and another from a free kick by Nasser Ahmad.

“The high commitment and discipline of our students made them surpass the finals successfully,” said Mr. Ahmad Syazali, who is the coach for the IUKL team. These talented football players are active members of the IUKL Football Club.

Prior to the finals, IUKL competed with the UiTM and the Management and Science University. With this triumph, the IUKL team will participate in the Grand Final League under the Institute of Higher Education Malaysia. IUKL is extremely proud of the university’s football team for this memorable achievement.

The IUKL Motorsport team participated in the UniMAP-Modenas Racing Challenge 2014. The event was held from 6 to 8 June, 2014 at the Universiti Malaysia Perlis (UniMAP) International Circuit, Perlis. As explained by the programme director of the race, Mr. Shayfuli Zamree Abdul Rahim, “The objective of this racing event is to encourage students, particularly engineering students, in understanding, developing, fabricating as well as contesting as one team.”

The event included two categories, which were Category A, MODENAS GT Open, and Category B, 131 cc. With over 22 contestants, the team managed to take home 7th place in the second category.

In addition to this achievement, IUKL is also proud to be the best among other private institutions who participated in this race, beating Multimedia University (MMU) and Taylor’s University.

The IUKL Motorsport team are determined and hopeful to be in the top spot in next year’s race.

Congratulations to the team for this outstanding achievement.

To view the results of the competition, please visit http://racingchallenge.unimap.edu.my/
This year, the Infrastructure University Kuala Lumpur (IUKL) has welcomed 35 exchange students from 15 institutions in Japan to undertake the English programme, learn the Malay language and to acquaint themselves on the Malaysian culture. Their experiences were captured through two programmes organised by IUKL.

Programme 1: 2014 Global Communication Summer Programme

This programme is specially designed for the students of the Toyota Technological Institute (TTI), Nagoya, Japan. This one-month programme took place from 15 August to 6 September 2014. A total number of nine (9) students participated in this programme, who were Ryo Sukemura, Shin Takao, Motohide Yoshimi, Tomomasu Kawabata, Shingo Suzuki, Kazuya Fukatsu and Kenta Onishi, and Ikumi Goto and Miho Takemura.

The main objective of this programme is for these students to learn English at IUKL. The students had the chance to visit companies across Malaysia. They have visited the Construction Site of De’ Centrum, the Sepang International Circuit, the UMW GaleriKu, and the Toyota Assembly Plant. Throughout this programme, the TTI students were housed at the Unipark Condominium. The idea behind this arrangement is to get them to socialise with IUKL students. Some of the TTI students shared units with them as well.

Besides attending English classes with our Intensive English Programme students, the students have also learned Bahasa Melayu, Batik Painting and Chanting, visited the Malacca Zoo, the Mini Malaysia, Tanjung Sepat, the Golden Palm Beach Resort, just to name a few. During their stay, the nine Japanese students got to taste the different types of Malaysian food.

Programme 2: Malaysia Truly Asia Summer Programme 2014

This three-week programme aims to provide exposure and spread knowledge to the Japanese students on the Malaysian culture, languages, economy and communication aspects. The 16 students who took part in this programme were from:

1. Muroran Institute of Technology
2. Otaru University of Commerce
3. Hokkaido University
4. Wako University
5. Keio University
6. Tokyo Future University
7. Tokyo University
8. Tokyo University of Agriculture
9. Kanda University of International Studies
10. Komazawa University
11. Gakushuin University
12. Seijyo University
13. Nagoya University
14. Tezukayama Gakuin University

The students had the pleasure to do batik painting and chanting, visited the homestay at Kampung Lonek Negeri Sembilan and helped cook ‘dodol’, fishing, learned and played the Malaysian musical instruments, treasure hunt, and many more. They also visited the Mini Malaysia, Malacca Zoo, Tanjung Sepat, Sepang International Circuit, the Kuala Lumpur Performing Arts Centre, Mid Valley and also the Kuala Lumpur Convention Centre. The students were in IUKL from 25 August to 15 September 2014.
The International Cultural Night is an event that grows each year in size and grandeur. This most awaited annual event took place differently this year. The three-day event showcased musical cultural performances and food and tools exhibitions. Representatives from 15 countries were in attendance that night to share their culture with the rest of the university through video presentations, pictures, posters, tools, and costumes. This event acted as a platform to experience the uniqueness of different cultures from around the world. Sweet delicacies and traditional food also attracted students to attend the three-day occasion.

It is important to mention the International Cultural Night, which is the last day of the event. The entire multipurpose hall was filled with IUKL staff, students, and participants from nearby universities such as Universiti Tenaga Nasional, Universiti Putra Malaysia, and Limkokwing University of Creative Technology. Every cultural performance received a loud round of applause from the audience, which were unforgettable moments for the organizing committee, the International Student Association. Every person attending the event could feel the merriment and excitement of the celebration across the hall. Some students cheered and showed their support for their own countries, which attracted the attention of all frontliners such as ambassadors, embassy counsellors, and the IUKL management committee.

IUKL has taken pride in uniting its students from 45 countries by holding this event every year. The success of this event was evidenced with the beautiful decorations, sparkling lights, and the indelible smiles on the faces of IUKL staff, students, and guests.

Johor Bahru hosted its very first half-night marathon called EduCity Sundown Malaysia 2014 on 21 June 2014 at Nusajaya. Approximately 5,000 registered runners from Malaysia, Singapore, Philippines, Brunei, China, Indonesia, India, USA, Iran and Australia participated in the Half-Marathon (21km) and 12km distances respectively at the EduCity Sports Complex. Mohd Ashraf Fateh, one of our staff, represented IUKL.

EduCity Sundown Malaysia 2014 was part of a plan to expand the Sundown Marathon brand, created in 2008 in Singapore, delivering its unique night running experience to runners all across the region starting with Malaysia. With the tagline ‘Bring on the night’, organizers were set to challenge the participants to a great running experience at night. Water stations were placed along the flat road with low-light conditions. Fruits, mineral water and t-shirts were given to the runners who completed the marathon.

“The marathon can humble you.”
- Bill Rodgers, four times winner of Boston and NYC Marathons.
The 8th Inter-University Invitational Civil Engineering Competition (8th IUICEC 2014), was hosted by the Department of Civil Engineering of Monash University from 6th to 10th July 2014. The aim of this competition was to design an aesthetically pleasing and innovative bridge capable of withstanding each of the applied loads whilst not over designing.

20 universities were invited to take part in this highly recognised competition which was supported by the Engineering Accreditation Council Malaysia (EAC) along with industry leaders around the globe.

IUKL proudly reaped fourth place among 13 universities who competed. The team members consisted of two students from the Faculty of Engineering and Technology Infrastructure (FETI); Mohd Haikal Rahim and Mohamad Halizuddin Hanaffi, Najiahah Omar; a student from the Faculty of Architecture and Built Environment (FABE), and Ir. Tengku Anita Raja Hussin, a lecturer from FETI, who also played as the leader of the team. The Static Load, Impact Load, Traffic Load and Hydraulic Load tests were perfectly done by the team.

By participating in this competition, the university hopes to produce a versatile future engineer and continue to endow students with more experience and skills in the any field they wish to take in their professional life.

This competition was held at the Monash University, Clayton Campus, Melbourne, Australia.
IUKL’S ‘JIWA’ TEAM WON FOUR AWARDS AT THE 26TH ARCHITECTURAL WORKSHOP (TIANG SERI), UITM, PERAK

The 26th Architectural Workshop (Tiang Seri) received participations from 19 institutions comprising IPTAs, IPTSs and two invitational institutions from Indonesia and Brunei. IUKL had sent a large number of delegates which consisted of 30 participants and 60 spectators. The team proudly carried themselves with the tagline “JIWA – Bina Berseni, Seni Berjiwa” throughout this event. The team was led by Mr. Saimul Nizam, a year two student of the Bachelor of Science (Architectural Studies), accompanied and supported by two lecturers from the faculty, Mr. Mohd Rizal Zakaria and Mr. Ahmad Mun’iem Ahmad Fauzi.

The IUKL team made the university proud when they managed to bring home the Best Performance Award, the Best Actor Award, the Best Installation Award and the Best Video Award. This astounding accomplishment indicates that IUKL has talented, determined and hardworking students.

IUKL’S ‘JIWA’ TEAM WON FOUR AWARDS AT THE 26TH ARCHITECTURAL WORKSHOP (TIANG SERI), UITM, PERAK

The Infrastructure University Kuala Lumpur (IUKL) had organized an International Infrastructure Conference (IIICON) 2014 from the 3rd to 4th of December 2014 at the Sunway Hotel Resort and Spa, Bandar Sunway. This conference has four satellite conferences underneath its wing, running parallel at the same venue to emphasize the four main areas of specialization in infrastructure:

1. International Conference on Built Environment (ICBE)
2. International Conference on Business & Management (ICBM)
3. International Conference on Engineering, Information Technology and Science (ICEITS)
4. International Conference on Language, Communication and Education (LANCOMME)

The primary objective of the IIICON 2014 Conference is to gather professionals, experts, practitioners and industry movers from various fields and backgrounds throughout the world to disseminate their knowledge and share their expertise and vast experience with participants. The main objectives of the conference are:

1. To integrate knowledge and progress among academicians, researchers, industries, corporate organisations and interest groups.
2. To enhance global academic, scientific and professional networking.
3. To deliberate on emerging trends, threats and challenges in the identified fields.

Current facilities have not kept pace with urbanization, community development, surging enrolments, business formation, transactions and expansion, growing population, and other developments that place huge demands on infrastructure. It is increasingly clear that a whole set of more integrated and coordinated actions are needed to steer nations towards a more sustainable future. Both infrastructure challenges and opportunities will be addressed at this conference to ensure sustainable nation-building in the 21st century and beyond.
